Eric Horvitz
Microsoft Research—Redmond Lab

"The One Hundred Year Study on Artificial Intelligence: An Enduring Study on AI and its Influence on People and Society"

Thursday, October 20, 2016
3-4pm
CIT 368

Abstract: I will present an update on the One Hundred Year Study on AI (https://ai100.stanford.edu/). I will describe the background and status of the project, including the roots of the effort in earlier experiences with the 2008-09 AAAI Panel on Long-Term AI Futures that culminated in the AAAI Asilomar meeting. I will reflect about several directions for investigation, highlighting opportunities for reflection and investment in proactive research, monitoring, and guidance. I look forward to comments and feedback from seminar attendees.

Eric Horvitz is a technical fellow and director of the Microsoft Research lab on Microsoft's main campus. He has been elected fellow of AAAI, ACM, and the National Academy of Engineering (NAE). He served as president of the AAAI and has served on advisory boards for the Allen Institute for Artificial Intelligence, NSF, NIH, DARPA, and the Computing Community Consortium (CCC). More information can be found at http://research.microsoft.com/~horvitz.
